

RICH MEDIA CONTENT

ON-DEMAND • ANYTIME

The Imperial County Office of Education has developed an *online library* of instructional modules and media presentations to support classroom instruction, professional development, and a variety of support needs.

WHY SHOULD I BE INTERESTED?

As a user

There's valuable content: The collection of content in the Media Library is continually growing. Search for media based on content area, target audience, type of resource, or keyword.

As an author

It's a powerful tool, full of possibilities: Imagine having the ability to capture your lesson, presentation, or training and to make it available for others *on demand*. From a Bunsen burner step-by-step instructional segment to an orientation for new students or employees, online modules can be put to work!

Best of all...

It's free!

DO I HAVE WHAT IT TAKES?

Internet access and an up-to-date web browser are all that are required.

SOUND GOOD?

If you'd like to get started using the Media Library, visit <http://library.learningtech.net/>. For more information, contact Learning Technologies at (760) 312-6403.
